SUMMARY

UI/UX designer with 3 years of experience designing websites, web apps and mobile apps for e-commerce, EdTech, HR and property inspection products. I take a product from the first problem to the finished screens: research, personas, user flows, information architecture, wireframes, final UI, design systems and developer hand-off. Because I also write frontend code, my designs are practical to build. Best Employee at Allyted Solutions in 2024.

SKILLS

UX: User research, interviews, affinity mapping, personas, empathy maps, user journeys, user flows, information architecture, wireframing, prototyping, usability testing

UI: High-fidelity UI, responsive design, design systems, component libraries, developer hand-off

Tools: Figma, Photoshop, Illustrator, Claude, Lovable

Also: HTML, CSS, JavaScript, React (basics), After Effects, Premiere Pro

EXPERIENCE

UI/UX Designer | Allyted Solutions, Hyderabad — Feb 2023 – Present

What I worked on: Designed Trainex Academy, VOYD Interiors, JaldiHire, the Property Inspection Tool, the internal HRMS and the Allyted website, and worked on each from the first brief until it went live. Also freelance work for Big Leap Technologies.

- **Research:** Study the domain and competitors, talk to users where possible, and turn findings into personas, empathy maps, journey maps and a clear problem statement.
- **Structure:** Map user flows and information architecture, and agree the flows with my manager before any screen is designed.
- **Design:** Sketch wireframes, then design high-fidelity UI for websites, web apps and mobile apps in Figma, with clickable prototypes.
- **Design systems:** Build design systems and component libraries so screens match across web and mobile.
- **Test and improve:** Test prototypes, collect feedback and fix the screens before hand-off.
- **Hand-off:** Give developers Figma files and specs, and check the built screens against the design. End to end, I stay with each product from the first brief to the live screens.
- **Beyond design:** Built frontend screens in HTML, CSS, JavaScript and React for Trainex Academy, the VOYD shop, the Property Inspection Tool and our HRMS. Prototype ideas quickly with Claude and Lovable.
- **Motion, logos and marketing:** Made motion graphics, logo animations and promo videos in After Effects and Premiere Pro, designed the VOYD and Trainex logos, and created marketing content for company products.

PROJECTS

More work in my portfolio: **ajay-portfolio11.netlify.app**

Property Inspection Tool | Mobile app and CRM web app for property inspectors — Apr 2026 – Present

- **Problem:** Inspectors lose about half a day turning their notes and photos into a PDF report.
- **Research:** Learned the domain, held interviews with inspection companies, and grouped the findings with affinity mapping. Wrote the problem statement and brainstormed ideas with my manager and the team.
- **Design:** Mobile inspection app where the inspector goes room by room, marks Pass, Fail or N/A, and adds photos and voice notes. CRM web app for leads, assigning inspectors by distance, and a worklist where reports are checked and approved. Designed the rework flow: a validator sends a report back with a remark and the inspector fixes only that item.
- **Test:** Improved the Home, Add rooms and Verify checkpoints screens after usability testing.
- **Also:** Coded some of the frontend. Part of it is complete and I am still adding features.

Ajaykumar Vodla UI/UX DESIGNER

VOYD Interiors | Website and online shop | **voydinteriors.com** Jan – May 2025

- **Research:** Researched how Design Cafe, HomeLane, Livspace and Houzz India sell interiors online. Made personas, empathy maps and journey maps.
- **Structure:** Mapped three user flows (get a quote, after the quote is frozen, shop to order) and the information architecture for the whole site.
- **Design:** One website for customers and vendors: get a quote, pick designs by budget with the balance always on screen, shop, check out and track orders. Designed account screens, vendor sign-up, mobile screens and the design system.
- **Also:** Coded the shop frontend, and made the VOYD logo and logo animation.

JaldiHire | AI recruitment platform | **jaldihire.com** Website Aug – Nov 2024 · Web app redesign in progress

- **Design:** Designed the website from scratch with a separate landing page for each of the three users: employers, job seekers and interviewers.
- **Now:** Running the UX audit and building the design system for the JaldiHire web app redesign (under NDA).

Trainex Academy | EdTech website | **trainexacademy.com** Jan – Jul 2024

- **Process:** Research, Figma prototypes and developer hand-off for the whole website.
- **Also:** Built the frontend (live, used by students and corporate clients across India), made the logo and logo animation, and edited the promo videos.

Allyted HRMS | Internal HR tool Apr – May 2025

- **Design:** Designed the screens of the company's internal HR tool in Figma. **Also:** built them as the frontend.

Big Leap Technologies | Freelance project, website and LMS | **bigleaptech.in**

- **Design:** Designed a 6-page website for a data engineering institute in Hyderabad in 2 months, plus the admin panel and student LMS (LMS still in design) and a drag-and-drop editor for the Tech Stack section.
- **Also:** Built the website frontend in React and custom CSS.

Allyted Solutions Website | Company website 2023

- **Structure:** My first project at Allyted. Planned the pages and how a visitor moves through the company website, then sketched wireframes.
- **Design:** Designed all the website screens in Figma, for desktop and mobile.
- **Hand-off:** Delivered the full design to developers within one month.

EDUCATION

MBA, Marketing | Jaya Prakash Narayan College of Engineering 2024 – 2026 (done while working full-time)

B.Tech, Electrical Engineering | Annamacharya Institute of Technology and Sciences 2019 – 2022

Advanced UI/UX Design with Generative AI | Intellipaat In progress, started September 2026

AWARDS

Best Employee, 2024 | Allyted Solutions, chosen from the whole company
