Profile

UI/UX Designer with 3+ years of experience designing complex B2B SaaS platforms, EdTech products, and HR systems. I think deeply about user problems, design intuitive end-to-end experiences, and bring them to life with clean visual design. Proficient in motion design and basic frontend development — I understand how my designs get built, which makes me a better collaborator and a faster executor.

Work Experience

02/2022 – Present
Hyderabad

Allyted Solutions, UI/UX Designer

- Designed multiple company products end-to-end — from research and user flows to final UI — across B2B SaaS, EdTech, E-commerce, and HR Tech domains
- Self-initiated, designed, and co-developed the company's internal HRMS platform (now used daily by the entire team) — identified real workflow pain points and proposed the product unprompted
- Built and maintained complete design systems with color tokens, component libraries, icon systems, and data tables used across all projects
- Created motion design assets — intro videos, logo animations, promotional and social media videos — using After Effects and Premiere Pro
- Won Best Employee Award at Allyted Solutions for outstanding contribution
- Collaborated closely with developers by providing implementation-ready designs and writing frontend code for UI components when needed

Education

Bachelor of Technology (B.Tech)

Jaya Prakash Narayana Collage of Engineering (MBA) - 2024-2026

Skills

UX Design

User Research, Wireframing, Prototyping, User Flows, Information Architecture, Personas, Usability

Frontend

HTML, CSS, JavaScript — building and integrating designed screens

UI Design

Visual Design, Design Systems, Component Libraries, Responsive Design, Figma

Tools

Figma, Adobe After Effects, Premiere Pro, DaVinci Resolve, Photoshop, Google Data Studio

Motion Design

After Effects (logo animations, intro videos), Premiere Pro (promos, social media), DaVinci Resolve

ACHIEVEMENTS & EXTRA

Best Employee Award, *Allyted Solutions*

recognized for outstanding performance and impact

Data-Driven Research Background

Built a complete manual recruitment system using Google Sheets + Google Data Studio before designing Jaldihire — directly informed the product's UX decisions

Motion Design Portfolio

Logo animations, intro videos, and social media promos delivered for Trainex Academy using After Effects and Premiere Pro

Projects

Jaldihire — 360° AI-Powered SaaS Hiring Platform, *UI/UX Designer — End to End*

- Designed 5 web application dashboards for 4 user types — Employer, Recruiter, Advisor, and Admin — 50+ screens total
- Built a complete design system: color tokens, button library, form components, alerts, data tables, icon system, dropdowns, and profile cards used across all 5 panels
- Created 4 user personas, mapped full user flows per role, and designed information architecture for each panel separately — each user type has a completely different mental model
- Designed the complete marketing website — homepage, employer/applicant/interviewer/services pages
- Key UX decisions: separate dashboards per user type, proactive BGV positioning, structured feedback system, instant payment flow for interviewers

Allyted HRMS — Internal HR Management System, *UI/UX Designer + Frontend Developer — Self-Initiated Project*

- Self-initiated: identified real problems in the company's daily workflows, proposed the product, got it approved, then designed and co-developed it
- Designed 17 modules from scratch — Attendance, Leaves, Reimbursement, Payslips, Directory, Assets, Role Management, Admin Panel, and more
- Designed role-based permission system — Admin creates roles and assigns module-level permissions, making the product flexible for any org structure
- Eliminated leave email chaos, WhatsApp-based reimbursements, and manual attendance tracking through thoughtful, friction-reducing UX
- Key UX decisions: balance shown before applying leave, auto half-day rule if < 8.5 hrs, flat icon grid navigation, card-based employee directory
- Developed the entire frontend in HTML, CSS, and JavaScript; integrated all APIs

Trainex Academy — EdTech Platform, *UI Designer + Motion Designer*

- Designed every page of the website — Home, Courses, Corporate, Reviews, Webinar, Projects, Privacy — and LMS dashboard, My Profile, and Recordings screens
- Created motion design assets for the brand: intro video (After Effects), logo animation (After Effects), and promotional social media videos (Premiere Pro)
- Users: Learners (freshers and professionals), Corporate clients (L&D managers), 300+ Trainers

Big Leap Technologies — Training Institute Website + LMS, *UI Designer + Frontend Developer — Freelance*

- Designed complete website and LMS platform end to end — from wireframes to final UI
- Developed the full frontend in HTML, CSS, and JavaScript; delivered complete design-to-development handoff independently

Voyd Interiors — Premium E-commerce Website, *UI Designer*

Designed complete e-commerce experience — 8+ pages including Homepage, Shop, Product Detail, Cart, and 5+ conversion-critical popups (Sign Up, Login, Contact) for a premium interior design brand
